

## In this Issue

- Fragblast 12
- 3rd IBGW

## Upcoming Events

The main activities taking place at the moment are:

- Development of a blasting geology book
- Preparation for Fragblast 12
- Organising the 3rd IBGW for Lulea, Sweden

## Fragblast 12 Symposium

At the 12<sup>th</sup> International Symposium on Rock Fragmentation by Blasting (Fragblast 12) staff from Blasting Geomechanics Pty Ltd will be presenting the following two papers”:

Trevor N Little and Mike B Lovitt. Role of blasting in assisting with value-based ore control in underground mines.

Dr Dane P Blair. Vibration modelling and mechanisms of wall control blasting.

## 3rd International Blasting Geology Workshop

Blast Geomechanics Pty Ltd in association with Lulea University of Technology are convening the one day 3<sup>rd</sup> IBGW - the third in this series. This 3<sup>rd</sup> IBGW has engineering geology as an overall theme.

Venue: Appropriate sized room at Lulea University of Technology

Timing: Sunday 10<sup>th</sup> June 2018, 8.30 am – 4.30 pm

Topics to be covered in the 3rd IBGW are:

- Blast wave propagation in variable geology and geometry [Keynote Speaker] (Dr Dane P Blair)
- Engineering geology for blasting – Scoping the territory (T N Little)
- Underground blasting in challenging geological environments (M B Lovitt)
- What every shotfirers / blasters need to know about geology and how geologists can help. (Dr Anne Charline Sauvage)
- Modern technologies for engineering geologic data acquisition relevant to blasting operations. (Dr Marcus Poetsch)
- Blasting Related Indices: the key to Underground Open Stope Mine to Mill (Dr E Sellers)

In the 3<sup>rd</sup> IBGW all attendees will be given the opportunity to introduce and briefly discuss a blasting geology related topic of mutual interest.

## Services

- Technical consulting
- Training & seminars
- Management support
